### CONFERENCES

Fusion conference highlights new lasers, Jan., p. 12.  
Progress in gas lasers, Jan., pp. 18-20.  
Conferences analyze YAG-eye interaction, Jan., pp. 24-26.  
Preview of OFC '83, Jan., p. 105.  
American Society for Laser Medicine and Surgery: third annual meeting, John Parrish, Mar., pp. 56-60.  
CLEO '83 preview, Apr., pp. 12-22.  
OSA: "Winter '83," Apr., pp. 24-30.  
Alexandria Conference on Photochemistry and Photobiology, May, p. 22.  
Armenia: Eleventh National Conference on Coherent and Nonlinear Optics, J. C. Diels, May, pp. 26-32.  
CLEO '83, May, p. 111.  
Los Alamos Conference discusses ABMs, other research frontiers, Jun., pp. 16-20.  
Laser 83 Opto-Elektronik 6th International Congress and Trade Fair, Jun., pp. 80-82.

#### FIBEROPTICS

##### Components and Instrumentation

5 Gbit/s repeater described at ECOC, Jan., p. 106.  
Locomotive leads data through TRW network, Feb., p. 79.  
PTR Optics studies alternate multiplexers, Apr., p. 85.

Laser linewidth narrowed to 10 kHz, Apr., p. 86.  
Transmission media for short-distance data links, Wunnava V. Subbarao, Apr., pp. 89-92.  
Cement splices yield lower losses than fusion techniques, May, p. 148.  
New single-mode laser structure described, May, p. 150.  
Bell Labs presents cleaved-coupled cavity laser, Jun., pp. 129-130.  
Codenoll announces data link for DEC computers, Jun., p. 130.  
A high-sensitivity radiometer for optical communications, George Meslener and John Schlafer, Jun., pp. 133-138.  
Wavelength division demultiplexers for single-mode systems, Jul., p. 87.  
New fiber has hard plastic cladding, Jul., p. 89.  
Siecor to supply cable for point-of-sale systems, Jul., p. 90.  
Strategies for active component testing, James E. Hayes, Jul., pp. 93-98.

##### General

Fiberoptic sales to grow 41% in 1983, Feb., p. 4.  
Angular division multiplexing in optical fibers, Gerald J. Herskowitz, Haim Kobrinski, and Uri Levy, Feb., pp. 83-88.  
Atmospheric optical communications link for a local area network, J. D. Fridman and J. Svacek, Mar., pp. 95-97.  
Life testing of diode laser sources: a case study, A. R. Goodwin and R. G. Plumb, Mar., pp. 111-114.  
Well hole drillers to use fiber links, Apr., p. 86.  
Preservation of polarization in single-mode fibers, S. C. Rashleigh and R. H. Stolen, May, pp. 155-161.  
French firms license Mini-Hub technology, Jul., p. 90.

##### Research

400 Mbit/s transmitted over 104 kilometers, Jan., p. 106.  
Microwave-frequency optical links, Daniel W. Bechtle and Stefan A. Siegel, Jan., pp. 111-115.  
Segmented fiber cores give low dispersion, Feb., p. 77.  
Birefringent fiber polarizes input, Feb., p. 77.  
Optical pressure transducer is less sensitive to environs, Feb., p. 79.  
GHz signal processing uses tapped fibers, Feb., p. 80.  
Bell announces 119-km transmission, Apr., p. 4.  
ZnSe IR lightguides for medical, other applications, May, p. 60.  
Bell sets distance record for unboosted fiber transmission, May, pp. 147-148.  
1000-km repeater spacings seen for undersea systems, May, p. 148.  
TRW demonstrates long-wave GHz link, May, p. 148.  
How pure is single mode?, May, pp. 150-152.  
Polarization-holding fiber improves gyroscope performance, May, p. 152.

\*This index includes all *Laser Focus* feature articles and major news stories, arranged by categories and in order by issue, that appeared between January and August 1983. The comparable index for *Electro-Optics Magazine* will appear in our next issue. The index for September 1983 to December 1984 of *Laser Focus* including *Electro-Optics Magazine* will be published next December.—Ed.

## INDEX TO 1983 LASER FOCUS

Material processing moving from feasibility to optimization, Apr., pp. 38-42.  
Large LCDV single-crystal spikes, May, p. 14.  
Alexandrite outperforms YAG in Apollo drilling tests, May, p. 38.  
Laser surface hardening spurs savings, May, p. 60.  
NATO "double jump" workshop on laser processing, Jun., p. 44.  
Short-time annealing, Jun., p. 45.  
The NATO "double jump" advanced research workshop, Jun., pp. 52-53.  
Ford installs high-volume welding lasers, Aug., p. 36.  
PC board fabrication: from razors to lasers, Aug., p. 48.

### Measurement and inspection

IRS measures supersonic flow, May, p. 36.  
Laser sensors for automated manufacturing, Donald W. Sweeney, May, pp. 93-98.  
Nonlinear optical probes of interfaces, T. F. Heinz, H. W. K. Tom, and Y. R. Shen, May, pp. 101-108.  
New surface probe developed at LBL, Jun., pp. 24-26.  
NBS links both length and time standards to cesium, Jul., p. 4.  
Laser refractory wear sensor incorporates He-Ne, world's biggest robot, Gary Neihsel, Jul., pp. 46-47.  
Light wine, Aug., p. 44.

### Military and police

Federal FY 1984 budget request: laser weapons up; ICF and isotope separation down, Mar., p. 4.  
Active mirror isolation for airborne lasers, Mar., pp. 26-28.  
HELs in space: no evidence of specifics, May, p. 4.  
MILES gains new features, May, p. 56.  
Helionetics and Teller dispute media allegations of impropriety, Jun., p. 4.  
Is "ALL" over?, Jun., p. 4.  
Lasers and defense, Edward Teller, Jun., p. 8.  
Space HEL R & D projection: conjecture, or on-orbit?, Jun., p. 10.  
DOD officials project laser programs and funding, Jun., pp. 10-14.  
Laser-guided missile demonstrates accuracy, Jun., p. 45.  
Shortcomings of laser weapons, Kosta Tsipis, Jul., p. 8.  
Lamberson at CLEO: laser weapons would increase enemy's uncertainty, Jul., p. 14-18.  
Helionetics counters media charges, Jul., pp. 28-30.  
Army to contract for handheld eyesafe rangefinders, Aug., p. 36.

### Optical data storage and reprographics

Optical data storage, Alan E. Bell, Jan., pp. 37-38.  
Role of optical data storage disputed, Apr., pp. 36-38.  
Matsushita to market erasable optical memory systems, May, p. 4.  
Compact laser scanner, May, pp. 58-60.  
Erasable optical data storage system, Jun., p. 44.  
Energy Conversion sues Matsushita over optical memory, Jul., p. 26.  
Storage Technology demonstrates optical memory system, Jul., p. 34.  
Critical issues in high-density magnetic and optical data storage: Part 1, Alan E. Bell, Aug., pp. 61-66.

### Scientific research

First sub-picosecond resolution of electrical transients, Jan., p. 4.  
Clouds in the lab, Jan., p. 22.  
Two-photon decay upholds quantum mechanics, Feb., p. 4.

"Universal" laser-surface interaction, Feb., p. 12.  
Sub-picosecond electrical sampling, Mar., p. 14.  
Low-power bistability uses bound excitons, Mar., pp. 30-34.  
Shock waves measured with ps resolution, May, p. 36.  
SEP at MIT, May, pp. 40-42.  
Dynamic nonlinear optics in semiconductors: physics and applications, D. A. B. Miller, Jul., pp. 61-68.  
Optical bistability advances reported at Rochester meeting, Aug., pp. 16-18.

## LASERS

### Components and instrumentation

British firm imports Russian high tech, Jan., pp. 20-22.  
New test for laser gyros, Mar., pp. 18-20.  
Approaching absolute accuracy, Mar., p. 24.  
New growth process yields large crystals, Mar., pp. 28-30.  
How to select acousto-optic modulators, Barry Grossman, Apr., pp. 49-53.  
Variable laser attenuators—old and new, Keith Bennett and Robert L. Byer, Apr., pp. 55-62.  
Materials for optical harmonic generation, R. S. Adhav, Jun., pp. 73-78.  
ZnSe Specifications to be reviewed at SPIE meeting, Aug., pp. 18-20.  
Laser measurement services at NBS, Collier N. Smith, Aug., pp. 53-55.

### Design and operation

Rotating disk laser proposed at Stanford, Jan., p. 12.  
Ten-laser array capable of multichannel optical recording, Jan., p. 12.  
Semiconductor lasers Q-switched at 3 GHz, Jan., pp. 105-106.  
CW diode laser array emits 3 W, Mar., p. 4.  
He-Cd laser emits red, green, and blue, Mar., p. 14.  
Xerox diode arrays emit over one watt, Mar., p. 36.  
Miniature CO<sub>2</sub> waveguide lasers from France: new uses, D. Camus, M. Ouhayoun, and Henry Hofheimer, Mar., pp. 54-55.  
Far-infrared laser—two decades of progress, Ralph W. Waniek, Mar., pp. 79-85.  
New garnet lasers: stiff competition for YAG?, Apr., p. 4.  
100-W excimer laser, Apr., p. 4.  
Zinc vapor laser, Apr., p. 4.  
Compact excimer laser, Apr., p. 4.  
Hughes eliminates tail from TEA laser pulse, May, pp. 38-40.  
New developments in solid-state lasers, Peter F. Moulton, May, pp. 83-88.  
Anti-Stokes observed in emerald laser, Jun., pp. 20-22.  
Military diode laser delivers high power in single mode, Jun., p. 26.  
Temporally tunable pulses from slab laser, Jul., p. 20.  
Progress with HgBr laser, Jul., pp. 20-22.  
Laser pumped by dense plasma focus, Jul., pp. 22-24.  
CW 194-nm laser, Aug., p. 4.

### General

Gould laser patents re-examined by patent office, Jan., p. 4.  
The continuing evolution of laser technology, Jan., pp. 6-8.  
The 1983 Laser Focus Technical Achievement Awards, Jan., p. 31.  
Advances in commercial lasers, Jan., pp. 47-78.  
Laser economic review and outlook: 17% growth in 1983, Feb., p. 10.  
Spectra-Physics pegs 1982 laser market at \$2.8 B, Mar., p. 4.  
Mortgaging the future, Benjamin Lax, Mar., p. 8.  
The European laser market: 1982, Mar., pp. 10-12.

## INDEX TO 1983 LASER FOCUS

European research on radiation effects presented at Photon 83, Aug., pp. 91-92.

### Systems

France to fiber 1.4 million homes by 1986, Jan., p. 4.  
British Telecom plans broadband system, Jan., p. 106.  
Times Fiber forms joint venture in U.K., Jan., p. 118.  
New company plans to develop custom systems, Jan., p. 118.  
Western Electric to build 432-Mbit/s single-mode systems for AT&T Long Lines, Feb., p. 4.  
New York Tel installs private fiber loops, Feb., p. 77.  
MCI plans single-mode eastern seaboard trunk along Amtrak route, Feb., p. 80.  
MCI to purchase 150,000 km of single-mode fiber, Mar., p. 4.  
Western's single-mode equipment allows wavelength multiplexing, Mar., p. 109.  
Elie network found reliable but expensive, Mar., p. 109.  
Army plans Korean lightwave trunk, Apr., pp. 85-86.  
Northeast corridor begins service, Apr., p. 86.  
Single-mode Atlanta installation carries two wavelengths, May, p. 147.  
Long Lines announces routes for single-mode installation, Jun., p. 129.  
Aetna plans local network demonstration, Jun., p. 130.  
Fiber SLC-96 loop equipment being installed commercially, Jul., p. 87.  
AT&T proposes six-fiber system for TAT-8, Jul., p. 88.  
Fiber trunks offer advantages for Egyptian cities, Aug., p. 91.  
Lightwave systems in the urban loop, Frederick M. Frintrup, Aug., pp. 95-99.

### INSTITUTIONS AND COMPANIES

Lumonics enters medical market, Jan., p. 97.  
LASAG joins U.S. laser industry, Mar., p. 4.  
Cooper Labs buys Lexel, Mar., p. 4.  
Excimer laser development applications at three U.K. labs, N. Djeu, Mar., pp. 38-40.  
Aerodyne Research, Inc., Mar., pp. 42-53.  
New CO<sub>2</sub> waveguide manufacturer, Mar., p. 102.  
The Howard University Laser Chemistry Division, Apr., pp. 32-34.  
Gas laser company starts up, Apr., p. 80.  
Laser Science, Inc. enters market, Apr., p. 80.  
Applied Photophysics acquires Anaspec properties, Apr., p. 80.  
Spectra-Physics and Xerox joint venture, May, p. 4.  
Laser programs at the University of California, Irvine, Michael W. Berns, May, pp. 44-46.  
Litton buys International Laser Systems, Jun., p. 4.  
Rochester starts optics program, Jun., p. 26.  
Guide to European laser activity, Jun., pp. 83-91.  
Max-Planck-Institut für Quantenoptik, H. Walther, Jun., pp. 93-97.  
Lasers in France: industry and research, Jacques Ernest, Jun., pp. 99-100.  
Laser R & D in the United Kingdom, S. D. Smith, Jun., pp. 102-105.  
Cooper Labs buys Molelectron, forms Laser/Sonics Inc., Jul., p. 4.  
Uniphase president, Coherent alumni form Cyonics, Inc., Jul., p. 30.  
Litton to buy International Laser Systems, Jul., pp. 26-28.  
Xerox sells MILES operations, Jul., p. 32.  
The new Columbia Microelectronics Science Laboratories, Jul., pp. 42-45.  
Com Tel to enter ion laser market, Aug., p. 36.

EO Systems formed, Aug., p. 36.

Spindler & Hoyer forms Physitex in U.S., Aug., p. 38.

MODEL to manufacture micro-optics, Aug., p. 38.

### LASER APPLICATIONS

#### Biomedical

Medical applications, Jan., pp. 38-39.  
Prototype IR fiber shown to laser surgeons, Feb., p. 4.  
IBM patents far-UV laser medical procedure, Mar., p. 4.  
Ophthalmic tools, lasered and laser, Mar., p. 60.  
Progress in photoradiation treatment of cancer following administration of HpD, James S. McCaughan, Jr., May, pp. 48-56.  
Far-UV photoetching of organic material, R. Srinivasan, J. J. Wynne, and S. E. Blum, May, pp. 62-66.  
The podiatric laser, May, pp. 66-68.  
Viewpoint: lasers in biomedicine, Michael W. Berns, Jun., pp. 66-71.  
Active component of HpD identified, Jul., p. 4.  
The future of photoradiation therapy in the treatment of cancer, Thomas J. Dougherty, Jul., pp. 55-57.  
The Clayton Foundation Symposium on Photoradiation Therapy, Daniel R. Doiron, Aug., pp. 44-46.  
Responses to "Viewpoint: lasers in biomedicine," Aug., pp. 57-59.

#### Chemistry and spectroscopy

Sub-picosecond measurement of unimolecular relaxation time achieved, Jan., p. 4.  
Unimolecular reaction timed at Bell Labs, Feb., pp. 24-26.  
Laser optogalvanic spectroscopy of molecules, Christopher R. Webster and Charles T. Rettner, Feb., pp. 41-52.  
Laser detection of hazardous molecules, Mar., pp. 34-36.  
New laser technique resolves absorption spectra, Jun., pp. 26-28.  
SRS sensitivity increased 1000 times, Aug., p. 24.

#### Fusion

Fusion, Jan., pp. 34-36.  
1983 ICF funding NOVA on track, Feb., p. 4.  
Antares test-fires successfully, Feb., p. 4.  
Novette completed at LLNL, Apr., p. 24.  
LANL ICF target facility on schedule, May, p. 24.  
Advanced glass laser studied at Livermore, May, pp. 32-34.  
First shot from new LANL KrF fusion laser successful, Aug., p. 4.

#### General

Locke Technology develops robotics laser, Jul., pp. 32-34.  
SME seminar on laser innovations in manufacturing technology, David A. Belforte, Jul., pp. 47-51.  
A blueprint for U.S. industrial policy, Paul E. Tsongas, Aug., pp. 8-10.

#### Material processing

Sub-micrometer resolution in laser processing of semiconductors, Jan., p. 4.  
500-W CO<sub>2</sub> lasers used to make accurate trim dies, Jan., p. 24.  
Laser fabrication of 3-D plastic objects studied, Jan., p. 26.  
Material processing and manufacturing, Jan., pp. 40-42.  
Laser diagnostics and photochemical processing for semiconductor devices reported, Feb., pp. 12-14.  
Material processing advances cited, Feb., pp. 14-16.  
Laser-formed carbon resistors, Feb., pp. 28-32.

## For your Optics Library.

This new Rolyn Catalog provides you with product information covering your needs for off-the-shelf optics. Write or call today for your free copy.

## ROLYN OPTICS

## INDEX TO 1983 LASER FOCUS

- Optics industry employment survey, Mar., p. 26.  
The missing middle, Donald C. O'Shea, Apr., pp. 8-10.  
Patent Office rejects Gould patent claims upon reexamination, May, p. 4.  
The laser industry: into the 1990s, May, p. 8.  
Dynamic competition: key to high technology economic performance, Burton Klein, May, p. 10.  
Highlights of the QEAS/IEEE China Study Group, Milton Birnbaum and Charles P. Wang, May, pp. 18-20.  
Aligning a laser beam with an acousto-optic modulator, Rick Arnold, May, pp. 109 and 125.  
Gould laser use patent rejected by Patent Office, Jun., p. 4.  
Australian scientist to receive \$300,000 damages after laser accident, Jun., p. 4.  
Thorium atlas, Jun., p. 20.  
Gould patent claims rejected by Patent Office, Jun., p. 30.  
Discussion on exports heats up Laser Focus seminar, Jun., pp. 30-34.  
Bill introduced to ease export controls, Jul., p. 4.  
Sales of laser publishing equipment to total \$2.5 billion by 1987, Jul., p. 34.  
AT&T settles in Gould patent suit, Jul., p. 36.  
First Laser Focus Technical Achievement Awards presented, Jul., pp. 58-59.  
White light lasers: a Chinese monopoly?, C. Grey Morgan and K. H. Wong, Aug., p. 12.

### Research

- Picosecond lasers and research, Jan., pp. 33-34.  
Ultrashort wavelength reported, Feb., p. 4.  
Ultrashort-cavity lasers studied at Bell Labs, Feb., p. 16.  
THG is obtained in supersonic jet, Feb., pp. 18-20.  
U.K. sponsors FEL, Feb., p. 24.  
Can phase conjugate resonators enhance laser performance?, C. R. Giuliano, R. C. Lind, T. R. O'Meara, and G. C. Valley, Feb., pp. 55-64.  
Femtosecond pulses at Cornell, Mar., p. 34.  
CW recombination laser, Apr., p. 4.  
Broad-band output from Na<sub>2</sub> laser, Apr., p. 4.  
High energies obtained from exploding-wire laser, May, p. 12.  
Discharge-pumped cadmium moniodide laser, May, p. 16.  
CW recombination laser, May, pp. 16-18.  
CW 194-nm light generated by SFM, May, p. 24.  
A new focus on laser instabilities and chaos, Neal B. Abraham, May, pp. 73-81.  
Self-pumped PCM demonstrated at Hughes, Jun., p. 22-24.  
Basic design considerations for femtosecond pulse dye lasers, C. V. Shank, R. L. Fork, and F. Beisser, Jun., pp. 59-62.  
Laser-activated electron sources for FELs, Peter Oettinger, Jul., pp. 10-14.  
Tunable pulses in near-IR, Jul., p. 18.  
How colored noise affects dye laser output, S. N. Dixit, Aug., pp. 12-16.  
Copper vapor laser operates at room temperature, Aug., p. 20.  
Gain observed on green band of I<sub>2</sub>, Aug., p. 22.

### OPTICS

- Coherent optics and holography in Leningrad, H. John Caulfield, Feb., pp. 20-24.  
Optics and materials roundup, Mar., pp. 16-18.  
Excimer optics: short wavelengths require careful material selection, Mar., pp. 20-22.  
A new "solution" for high-energy laser optics, Lee M. Cook and Karl-Heinz Mader, Mar., pp. 73-76.  
Double-sided grinding and polishing, May, p. 40.  
Teflon plumbing aids optical coating, Jun., p. 14.
